Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

The listing of references in the specification is not a proper information disclosure, statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892 or by applicants on Form 1449, they have not been considered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Verlijdonk et al.

Example 15 teaches a phosphor comprising barium, yttrium, gadolinium, boron and oxygen and activated by terbium. The reference clearly teaches the claimed phosphor.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Verlijdonk et al.

Art Unit: 1755

This reference teaches a terbium activated phosphor having the formula $M_3Ln_{1-x}Tb_x(BO_3)_3$, where M can be Ba and Ln can be Gd and Y. Thus this reference suggests the claimed phosphor.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fouassier et al.

This reference teaches a phosphor having the formula $M(II)Ce_{p1}M_{p2}Tb_rB_9O_{16}$, where M(II) can be Ba, M can be Gd and Y, r is 0.1-0.9, p1 is 0.1-0.9 and $p2=p-p1$, where p is greater than 0 to 1 and $r+p$ is 1. The taught formula overlaps that claimed. Product claims with numerical ranges which overlap prior art ranges were held to have been obvious under 35 USC 103. *In re Wertheim* 191 USPQ 90 (CCPA 1976); *In re Malagari* 182 USPQ 549 (CCPA 1974); *In re Fields* 134 USPQ 242 (CCPA 1962); *In re Nehrenberg* 126 USPQ 383 (CCPA 1960). The reference suggests the claimed phosphor.

Claim 4 is allowable over the cited art of record. There is no teaching or suggestion of a vacuum ultra-violet radiation exciting light emitting element comprising the claimed phosphor.
